

Series 150 Releasing and Circulating Overshots

Applications & Benefits

The Series 150 Releasing and Circulating Overshot provides the strongest tool available to externally engage, pack-off, and pull a fish. The basic simplicity and rugged construction with which it is designed have made it the standard of all external catch fishing tools.

Use

A Bowen Series 150 Releasing and Circulating Overshot is used to engage, pack off and retrieve twisted-off or lost tubing, drill pipe, coupling, tool joint, casing or other similar fish.

Key Features

- Each Overshot is a carefully engineered unit. Capable of withstanding extremely heavy pulling, torsional and jarring strains without damage or distortion to either the tool or the fish.
- Continually developed to new standards of strength and efficiency and are expertly constructed of the highest quality material.
- The Series 150 Overshot is a compact unit designed to engage, pack off and pull a specific size of tubing, pipe, coupling, tool joint, drill collar or smooth O.D. tool.
